The bankers have a lot to answer for!

We have been extremely fortunate to have had an amazing year in the present economic climate and we have seen our turnover rise from £21 Million to £29 Million. This is due to a number of reasons, but significantly the work on the Leicester Schools for Miller Construction and the contribution of the Basingstoke office has boosted the figures for the year.

We do, however, face the next 12 months with less optimism than we did this time last year. There are still a number of substantial orders to be started, including Stoke Sixth Form College, the Staffordshire Fire Stations, schools in Nottingham and Leicester as well as a number of smaller projects, but we have noticed a drop in enquiries and margins on tenders have been getting tighter for the last 12 months. It is difficult to predict when the situation will improve, and general opinion indicates that it will be towards the end of 2010 before we notice a significant improvement.

We have taken a number of steps to control our overheads and expenditure and we have reluctantly deferred staff pay rises until the situation improves. Unfortunately we are having to make further changes to reflect the downturn in activity which sadly has meant that a number of redundancies are necessary.

It is at this time that your contribution on site, or in the office, can really make a difference. We have tried to emphasise this in developing our procedures and policies to gain our Investor in People award. Your actions, behaviour and attitude on site can make such a difference to whether or not we win contracts.

Our performance on and off site is so carefully measured using KPI's (more explanation of these in a later article) that we need your help to maintain our commercial advantage over our competition. Make no mistake, there are plenty of our competitors who look enviously at our clients, our relationships and our workforce and are only too pleased to offer their help to our clients if we slip up!

Company Celebration

Birmingham Hippodrome 3rd June 2009

As a break from all the depressing news we felt that it was the right time to celebrate the Company's 90th birthday and our IIP award. Almost 170 members of staff and their guests attended a performance of Chicago at the Birmingham Hippodrome. Welcoming everyone to the event, Robert Hinton briefly covered the history of the company from it's formation in 1919 to the present day. David Sothers and Bill Edmonds were there to help us mark the occasion and Robert acknowledged their contribution, together with John Dawson and Brian Hinton, to making the company into the successful business that we now have. The contribution of everyone in working towards the Investor In People award was also recognised and the cultural changes that had been made in order to meet the standard.

A special award was made to Paul Chapman for 25 years service at the company. Paul was presented with £500 of garden vouchers.

Other photographs from the event can be accessed and purchased from a link on our website – News Section.

I would like to mention the staff at Birmingham Hippodrome for their help and support. When I approached them with the idea they could not have been more helpful. The evening went without a hitch and the buffet reception was first class – thank you Danielle and Damien.

We will soon be starting on site at the new Stoke on Trent 6th Form College. Working for Miller Construction we have been progressing the design of the building services with Architects Broadway Malayan and Structural Engineers Couch Consulting since our appointment in April last year.

The project comprises the construction of a new building in the centre of Stoke on Trent. When the new building is completed next summer the Sixth Form College will relocate from their existing Fenton Moor Campus. Our subcontract with Miller Construction incorporates the design, installation and commissioning of all electrical, mechanical and public health services and also includes all ICT cabling, provision of Rainwater Harvesting and Photovoltaic Panels.

The building occupies a busy city centre site and due to the external noise is fully mechanically ventilated. The design will be to BREEAM Very Good standard. The building represents the first phase of the Stoke on Trent University Quarter and we hope to have the opportunity of being involved in future phases.

Rob Turner, Lee Manning and Simon Flanagan will be managing the contract.

Please contribute to the newsletter with ideas and suggestions for articles or features.

You can ring me at the office on 0121 507 2044 or email steve.craddock@sothers.com

Blast from the past!

This picture of a young fresh-faced electrician was taken circa 1960 (you do the maths!). There is a very scary resemblance to another member of staff who is noted for using Emma's hairspray. I'm not sure if it hairspray or glue that he needs!!

I'm particularly impressed by the early use of H&S equipment. Vital when you consider that this was taken 400 ft up a pylon!

KPI's – What is all the fuss about??

Well firstly I should explain that a KPI stands for a *Key Performance Indicator*.

Our clients and the contractors we work for have always kept a "score" when we have been working for them. In the past this has been done informally and our reputation was built up over a number of years of working with our clients. The developments in Health & Safety and Construction legislation has meant that the informal scoring done in the past has become much more sophisticated and wide ranging than it ever used to be.

The changes in legislation have put a huge burden on the main contractors (and us!) to make sure that we comply with the law, and also make sure that everyone else on the sites are playing their part too.

One of the ways they have done this is to develop a supply chain and actively encourage our involvement in the process. A great deal of this revolves around Health & Safety, and almost every site will have noticed the introduction of Yellow and Red cards for breaches of the Site rules. Our position as an Approved Supplier of M&E services is measured in dozens of ways and they have whole departments set up to record and monitor our performance from the start to the finish of every contract.

The information that they collect is stored and measured and our KPI's are compared to other subcontractors. If our scores fall below a certain level we will lose our approved supplier status and will not be asked to tender for future work. As you can imagine this impacts on everyone in the company.

The single most frustrating thing is losing points because of H&S breaches. Just recently we have lost points for not closing the gates on the mini podiums and not locking off the wheels on mobile towers. We have invested over a quarter of a million pounds in the last 2 years in training and simple mistakes like these could prevent us from tendering for future work.

Perhaps our failure is that we haven't made you aware how important these things are. Hopefully this article will set the record straight and we should have fewer incidents like this on site.

I have posted a typical pre-tender questionnaire on the website in the News section. Also a typical KPI report from one of our Main Contractors to illustrate the areas in which we are being scored.

INVESTOR IN PEOPLE

Not too much to report this time about IIP. The external assessor gave us a number of areas for development and we are still working through the training plans from the last reviews.

Current training includes the Site Management Safety Training Scheme (SMSTS) course for the project engineers. This is a 5 day course which helps site managers (and anyone wanting to become a site manager) to develop a better understanding of the legal, moral and social responsibilities of their role, and to manage health and safety on site in accordance with current legal provisions.

This will be followed by the 2 day Site Supervisor Safety Training Scheme (SSSTS) course has been designed to meet the needs of site supervisors within the construction industry. The course aims to highlight the need for risk assessment in the workplace, implementation of the necessary control measures and adequate communication and monitoring in order to provide and maintain positive standards of health, safety and welfare on a construction site. Both of these courses are being specified as the minimum qualifications for supervision and management on sites by our main contractors.

Saving the pennies!

By Christina Sadik

The Credit crunch is affecting us all, try as you may to avoid it, it will get you somehow! If it isn't the fluctuating fuel costs it's the household bills. Groceries cost more and holidays continue to increase in price. Whilst you will probably be feeling the pinch there are a number of ways you can help yourself and your family decrease costs, as the old saying goes 'look after the pennies and the pounds will look after themselves'.

Here is a list of some things you can do to help yourself during the 'crunch':

Petrol – there is a great difference between the prices from one petrol station to the next. The website: www.petrolprices.com can help. It asks for your postcode and then advises of the cheapest petrol stations in that area.

Trains – If you are using the train to travel try to book in advance online. You can print off electronic tickets and can save hundreds of pounds. Other money saving tips when booking a train is travelling out of peak hours, specifying the return train time rather than having an open return and buying two singles as opposed to a return. Try www.trainline.com.

Hotels – If you require a hotel always try to book online, there are many comparison websites such as www.laterooms.com , www.hotels.com. If you take the time to search the sites you could make big savings. Hotels often offer cheaper rates if you book online.

Shopping online – try searching for it online, there are many comparison websites that will search for the cheapest price online for you. www.kelkoo.com is a good price comparison website. If you are purchasing CD's, DVD's, memory cards etc. these are much cheaper online as they are sent to you direct from Jersey where there is no tax.

Discount codes – Whilst ordering online be sure to check the voucher discount code websites that offer many codes that can be inserted into the coupon box at checkout, these offer % discounts, free delivery and many more. Try www.myvouchercode.co.uk

Gas and Electricity – It may be worth checking some comparison websites to see if you can bring your costs down. www.uswitch.com is a good place to start!

Car Boot Sales – We have all got a cupboard somewhere in our homes that contains a lot of junk, sort out the junk and do a car boot sale this summer. There are many sites that hold the sales usually at the weekend. It can also be a fun day out for all the family and if it's a sunny day you may even get a tan! You can find details of local 'boots' in local newspapers or you can visit www.carbootjunction.com. If you don't fancy this try on an online auction such as ebay.co.uk

A gem from the archives!

John Travolta eat your heart out. Move over because the new King of Disco has arrived.

COMPANY NEWS

Apologies for the delay in producing this newsletter – I will try to get the next one done before Christmas.....2010!! SRC

Congratulations to Gary Hegarty and his partner Lynette on the birth of their daughter Ciara on 19th March 2009.

Elizabeth Alice Fowler was born on March 26th 2009 to Martin and Vicky.

Alan Kavanagh wants it known that he has won the Dream Team & and the F A Cup Competition (i.e the double). It's the second time he has won the league and asked whether Sothers would pay for two glamour models to pose with him while holding the trophy? *Sorry Al - the computer says No!*

Matthew Husselbee married Laura on 11th April 2009.

Mr Turner has informed me that he is tying the knot with Serena (No - not that one!) on 19th September 2009. I'm trying to read the note - I think it says that you are all invited to the wedding - but I may have that bit wrong! Best check with Rob.

Finally Serena (yes - that one!), Lisa, Louise Stokes and Sue are taking part in the 5km "Race for Life" on 12th July in aid of Cancer Research. They are trying to raise over £500. If you would like to sponsor them please contact the general office.
